

EXISTING BUILDINGS TO NEARLY ZERO ENERGY BUILDINGS (nZEB)

a Bureau of Energy Efficiency (BEE) initiative

feasibility at zero cost !

Be one of the 100 buildings.

We will perform a feasibility study to provide a roadmap to achieve nZEB.

Conventional Building

Nearly zero energy building
<15kWh/sqm/year

Net zero energy building
0kWh/sqm/year

Minimum Requirements:

Area >5000sq.m

Connected Load >100kW/ Contract Demand >120kVA

Building Types

Education Institutions | Health Care | Hospitality | Shopping Complex | Airports, Railway and metro stations

benefits

Energy consumption analysis

nZEB rating/ Existing Building rating feasibility

Building energy systems mapping

Cost benefit analysis

Recognition and Awareness
